Lisa Chandra

GSoC '20 @OpenRefine | Google WTM Scholar '20
New Delhi

Summary

I love how computer science related fields have a huge impact on not just the day to day lives of people, but also other seemingly unrelated sectors. And the fact that there is always something new to learn and do is just an added bonus. I'd like to do my part to make this world a better place, especially when I can have so much fun doing so.

Experience

Innervé

Core Member

July 2020 - Present (2 months)

Innervé is the annual technical festival of IGDTUW. I am a core member and the lead of the web development team for the 2020 iteration. Due to the current pandemic situation, the fest has been shifted to online mode. My work involves leading the web development team to build a website to give all the events an online platform for execution along with registrations.

Google Summer of Code

Google Summer of Code'20 @OpenRefine

May 2020 - Present (4 months)

OpenRefine is a powerful web tool used for cleaning and working with messy data. My project is to change the navigation system of the datasets from pagination to scrolling. This involves improving data retrieval time along with implementing virtual scroll in order to keep the DOM overhead limited. Overall the project is supposed to increase user friendliness and improvise unnecessary reflow events to make the tool faster.

ACM, Association for Computing Machinery

Core Member

February 2020 - Present (7 months)

Being a core member of ACM-IGDTUW, my work involves handling and organizing events in order to increase awareness about various opportunities and tools amongst the students. There are different teams to work on different aspects and I am a part of the web development team and have lead a group of volunteers and member for various events.

I was also the event head of The Open Source Challenge Series organized under Advaya, the first ever tech week for IGDTUW. This series involved mentoring and guiding a group of students to learn more about Git and GitHub and how to use them.
